

Objective: Motivated Information Technology student with a strong interest in DevOps Engineering, Cloud Technologies, and Infrastructure Automation. Proficient in Linux, Git, Docker, Kubernetes, AWS, Python, and CI/CD practices, with practical experience gained through academic projects and personal learning. Passionate about streamlining software delivery, improving system reliability, and continuously expanding technical expertise in modern DevOps and cloud ecosystems.

Area of Interest:

1. Devops.
2. Machine Learning.
3. Cloud Computin.

Education:

Bachelor of Engineering in Information Technology | Dr. Mahalingam college of Engineering and Technology, Pollachi.
06/2028 | 8.18 CGPA

HSC | St.Xavier's Higher Secondary School, Palayamkottai.
03,2024 | 87%

SSLC | St.Xavier's Higher Secondary school, Palayamkottai.
05,2022 | 86.16%

Skills:

Technical Skills:

- **Programming Languages:** Java, Python, Shell Scriping.
- **Operating System:** Linux(Ubuntu), Windows,.
- **Devops Tools:** Git, GitHub, Docker.
- **Web Technologies:** HTML, CSS, JS, React.js.

Soft Skills:

- **Analytical Thinking** –interpret data and make informed decisions.
- **Problem Solving** –develops practical solutions.
- **Quick Learner** – Adapts quickly to new technologies and concepts
- **Team Collabroration**-Work Effectivly in Collabrative Environment.

Projects:

1. Hospital Management System

Technologies: Java, Swing, JDBC, SQL

Objective: Developed a desktop-based Hospital Management System to manage patient records, doctor details, appointments, and billing. Implemented CRUD operations using JDBC and SQL, providing an efficient and user-friendly healthcare management solution.

2. Routine Tracker

Technologies: MongoDB, Express.js, React.js, Node.js (MERN Stack)

Objective: Developed a full-stack Routine Tracker application that enables users to create, manage, and monitor daily tasks. Implemented user authentication, task tracking, and progress monitoring to improve productivity and daily routine management.

3. Medical Insurance Cost Prediction Dashboard

Technologies: Python, Pandas, NumPy, Scikit-learn, Machine Learning

Objective: Built a machine learning dashboard to predict medical insurance costs using regression algorithms. Performed data preprocessing, feature engineering, model training, and data visualization to deliver accurate predictions and support data-driven decision-making.

Internships:

Thiranx – Full Stack Web Development [Remote]

[06.06.2026] to [05.07.2026]

- Developed responsive full-stack web applications using the **MERN Stack (MongoDB, Express.js, React.js, Node.js)**.
- Built and integrated **RESTful APIs**, implemented CRUD operations, and connected applications with **MongoDB**.
- Designed responsive user interfaces using **React.js** and collaborated on developing scalable web solutions.
- Used **Git and GitHub** for version control and project collaboration while following modern web development practices..

Certifications:

- Completed Oracle Fusion AI Agent Studio Certified Foundations Associate .
 - Completed Fundamentals of Devops and Cloud in Couresera
 - Participated in CodeChaos – Sophomore Edition at Technofete'26 and developed an Enhanced Hybrid Recommendation System using BERT for sentiment-based personalized recommendations.
-

Achievements:

- Won National Means Merit Scholaeship (NMMS).
-

Extracurricular Activities:

- Member of **National Service scheme (NSS)** in college
- Attended technical workshops, webinars, and seminars on Devops ,Artificial Inteligence and Full Stack web Development.
- Engaged in continuous self-learning through online coding platforms and technical communities
- Committee Member, Infobee Association, Department of Information Technology.
